The Road to Autonomous Operations

A three-part series by Arkham x Circle K

While Silvia sleeps, Arkham scans 1,000+ stores. She walks in knowing 3 that need her.

I used to spend my mornings reacting.

Now, Arkham shows me where to focus before problems happen.

I can spend my time solving the right problems.

Silvia
District Supervisor, Circle K

Arkham's Control Tower processes every store, SKU, and category overnight. By 7:00 AM, Silvia and hundreds of supervisors start the day with clear priorities.

From District Supervisors to Category Managers, Circle K's employees share **one advantage:**

They see what is coming, prioritize what matters, and take action faster.

The AI operating layer for your business.

Arkham's Control Tower connects ERP, POS, and WMS into one intelligent view across 1,200+ stores. Predictive models identify opportunities and risks. AI agents recommend actions and drive resolution.

Building a Control Tower inside Arkham

1

Unify data and context

Create a trusted operational view across your business.

2

Train AI on your operations

Predictive models and agents identify risks, opportunities, and next actions.

3

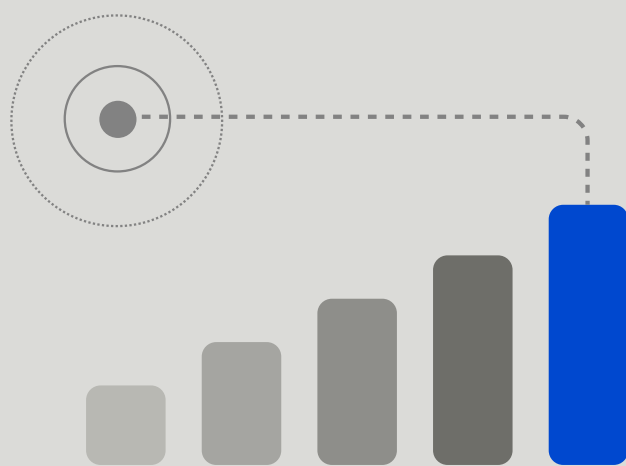

Empower teams to act

Deliver intelligence and workflows directly to operators.

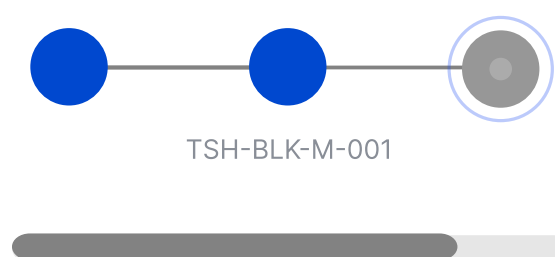

The foundation for operational excellence.

At Circle K, the Control Tower became the foundation for AI-powered operations. New use cases emerged, results compounded, and the operation kept improving.

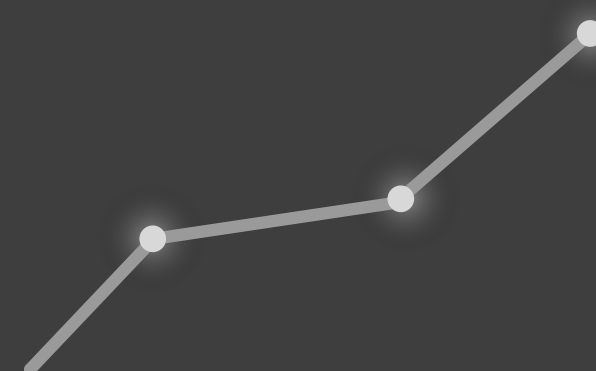

Store-level deep dives

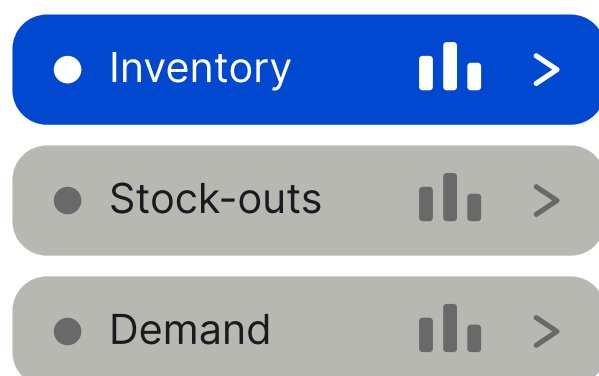

SKU-level inventory diagnostics

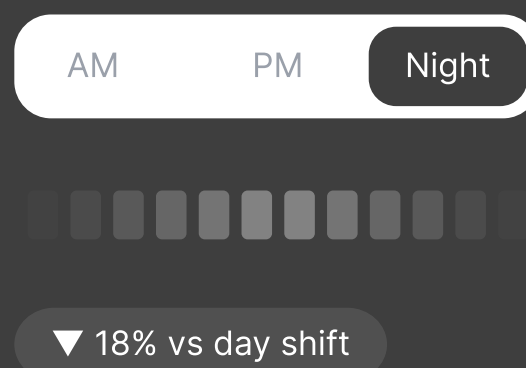

New store performance

Supply chain intelligence

Shift-level performance
